

## Fund D&O Insurance

The investment fund sector is a diverse and complex one for which specialist insurance advice should be sought from an insurance broker with both the relevant experience and expertise. Many feel that they need to look towards London for an insurance broker with the ability to assist in this area of their insurance protection, however, a similar level of experience, expertise and insurer contacts can be found through Vantage.

Vantage, one of Jersey's leading firm of insurance providers for professional and financial risks, offers a dedicated service to the offshore funds industry for its varied insurance requirements. As an offshore based broker we understand the needs of those working in this environment and offer a comprehensive, professional and highly personalised service, whilst also ensuring we provide a simple and easy-to-understand approach.

Some brokers commoditise this important insurance cover however our experience has shown that a "one size fits all" approach can be costly. Our approach is to acquire a full understanding of the fund, its size, geographics and investors before identifying and recommending the insurance cover or product that will best serve the risk exposures. Once these have been ascertained, our independence and the excellent working relationships that we maintain with a range of insurers, enables us to provide efficient solutions that are beneficial both in terms of cost and policy protection.

We act as a trusted partner for many investment funds and leading firms of fund managers, investment managers / advisors, General Partners and Limited Partnerships. With close working relationships with these parties we ensure that each has a full understanding of the complexities of the financial risks they face within the regulatory and legal environment in which they operate.

Our capabilities include advice, quotations and the placement of insurance cover for Directors' & Officers' Indemnity insurance, Professional Indemnity insurance, and Crime / Fidelity insurance. We often discover there is a great deal of confusion as to the correct insurance protection which should be purchased - either as a precautionary or prudent measure, or in many cases, that which is required by the Regulator.

Please get in contact with the team to discuss further.
